Floor 2 The Milton, 55 Railway Terrace, Milton

Get hands on experience and education in –

- Building computers from individual parts
- Setting up operating systems onto new and existing computers
- Understanding the positives and pit falls of Social media platforms such as Facebook and Twitter.
- Setting up wireless and wired networks from scratch
- Get hands on experience using collaborative programs such as Google Drive, Google Sheets and much more.
- Learn how to protect your own computers and networks from viruses and malware attacks
- Understanding websites and how to build basic web pages

How the course works –

- Students will attend 4 days of hands on training during our Dec – January school holiday work shops
- During term one, students will attend 5 x 2 hour, online live teach workshops from the comfort of their own home via video link (Zoom)
- Students attend another 1 day hands on master class during the Easter holiday break where they learn about the software used to create websites
- During term two, students will attend another 5 x 2 hour, online live teach workshops from the comfort of their own home via video link (Zoom)
